PROFESSIONAL SUMMARY

Founder of WGT EduTech, working to normalise gamified learning. Online tutor and digital creator: eight years teaching English to children, teens and adults, plus online guitar tuition, and hands-on practice in the tools Kodland students use — Blender, Three.js/WebGL, Canva and Photopea.

TEACHING EXPERIENCE

Founder — WGT EduTech (gamified learning studio)

Self-employed | Remote | 2026 – Present

- Founded WGT EduTech to normalise gamified learning — building and publishing the lesson formats, tools and games behind it; 18 public repositories live.
- Shipped learning products for children: VocabForge, Sliding In (1,452 speaking prompts), VBook Reader and Maker, and IELTS Speaking Practice.

Online English Tutor — ESL, IELTS & Business English

Allschool | Remote | 2021 – Present

- Teach English and Scratch coding side by side with children: the coding is the content, the English is the medium.
- Design gamified lessons — XP, streaks and in-lesson challenges — used with real students rather than as theory.
- With beginners, the student directs the game: they give the instructions and describe what happens on screen, instead of repeating vocabulary.
- Result: a seven-year-old student now needs work two years above her year group to stay challenged, and is the pupil chosen to speak for the school when exchange students visit.
- Run regular progress assessments and adjust each learner's plan against measurable growth.

Online English Tutor — ESL, IELTS & Business English

Fluentify | Remote | 2018 – Present

- Teach children, teens and adult professionals across reading, writing, listening and speaking.
- Write individual learning plans, original lesson materials and progress reports for every student.
- Adapt instruction for learners with limited first-language literacy and for neurodiverse learners.

Substitute Teacher — Grades 4 & 5

RBPS Primary School | South Africa | Feb – May 2021

- Taught Grammar, Literature and Life Skills to mixed-ability primary classes.

Education Facilitator — Special Education (English, Grades 8–10)

Gymnasium Buchloe | Germany | 2016 – 2018

- Taught English to Grades 8–10 and specialised in learners diagnosed with ADHD, ADD and Autism.
- Designed scaffolded, multisensory literacy materials with visual supports for neurodiverse students.

DIGITAL CREATIVITY & BUILD EXPERIENCE

- Live apps I built and shipped — DOH // ORBITAL CORE, a circular Tetris in plain HTML5 canvas (wgt-edutech.github.io/orbital-core) and Scalien, a fretboard analysis app mapping scales, modes and chord shapes onto the guitar neck (articulate-english.github.io/scalien)
- Blender — 3D modelling, materials and rendering (Eevee / Cycles) for animation and game art.
- Three.js / WebGL — interactive 3D scenes, custom shaders, particle systems and scroll-driven 3D in the browser.
- Graphic & brand design — Canva and Photopea for logos and assets; Figma-style design systems.
- Animation & motion — GSAP / ScrollTrigger, canvas and WebGL motion effects; video editing with ffmpeg.

CORE COMPETENCIES

Teaching children & teens (ages 8–18) | Gamified lesson design | English through coding (Scratch) | 3D principles: modelling, perspective, rendering | Graphic tools: Canva, Photopea, Figma | Animation & motion design | Curriculum & lesson design | Differentiated & special-needs instruction | Native-level English (CEFR C2) | Remote delivery: Zoom, Google Classroom, LMS

EDUCATION & CERTIFICATION

TEFL Teaching Certificate — TEFL Professional Development Institute | 2016

Bachelor of Commerce (B.Com), Marketing Management — University of Pretoria | 2007

LANGUAGES

English — Native | Afrikaans — Native | German — Professional proficiency | Spanish — B1 (CEFR) | Mandarin, French, Japanese — Basic

TECHNICAL SETUP

Stable high-speed internet, HD webcam, headset and a quiet dedicated workspace (20 Mbps+).
